INFOS

The *Music From Africa* series comprises two volumes of never-heard South African library music from the early '80s.

They were recorded and produced by Johannesburg musician/producer **Tom Mkhize** and released then on vinyl only to be sent to TV and radio stations, as well as cinema productions (never commercially available). Traditional South African rhythms re-imagined, dubbed-out and disco-fied by this legendary producer!

Each side of each volume is an A-Side of the original LP's, the B-Sides were only 10/15 seconds loops of the tracks from A-Sides designed as radio jingles and there was no interest in keeping them for the reissues.
