Moar has been producing over the past two decades. He now launches for the first time an album strictly instrumental.

"The White Album" offers a scope of twenty beats whose influences will be sourced in African, Asian & American music. Moar relates to musical influences who's accompanied him since his early beginnings, merging samples to keyboard melodies played by himself. Versatile artist, his style will be found on the artwork sleeve.

The beatmaker has even drew the stamp used for a 200 copies white wax limited edition.
